Summary

Aspiring engineering student and **CTO at PlayMate** with strong expertise in software development, data science, and IoT. Experienced in leading and delivering impactful academic and industry projects. Seeking internship or placement opportunities to apply technical and leadership skills while contributing to innovative organizational goals.

Education

R V College Of Engineering

Bachelor of Engineering in Information Science

CGPA: 9.23

Aug 2023 – 2027

Bengaluru, Karnataka

BGS PU College

Pre-University – PCMB

Percentage: 97.66

Apr 2021 – Mar 2023

Chikkaballapura, Karnataka

Projects

PlayMate – Esports and Offline Games Community Platform | *React.js, Node.js,*

September 2025

Express, WebSocket, PostgreSQL

- Built a real-time gaming community platform for esports and offline players to chat, form teams, and host tournaments.
- Implemented WebSocket-based communication for seamless real-time chatting and live updates.
- Developed team and tournament creation modules enabling users to collaborate and compete interactively.
- Led the project as CTO, overseeing full-stack development and product design.

HandSpeaks – Smartwatch-based Hand Gesture Recognition System | *Python,*

March 2024

TensorFlow, LSTM, Bluetooth, Flask

- Developed a system to recognize hand gestures using smartwatch motion sensors and convert them into speech and text.
- Trained an LSTM-based deep learning model on a custom dataset for accurate gesture classification.
- Enabled real-time Bluetooth communication between smartwatch and web interface for gesture detection.
- Integrated text-to-speech and display modules to assist individuals with speech impairments.

College Collaboration Platform (DBMS Project) | *React, Node.js, Express, Prisma,*

November 2025

PostgreSQL

- Built a full-stack platform enabling students to propose ideas, form teams, upload projects, and collaborate with mentors.
- Implemented mentor verification workflows, project showcases with Git/Drive integration, and automated placement eligibility checks.
- Developed a secure backend using Express, Prisma ORM, PostgreSQL, and Swagger-based API documentation.

Technical Skills

Languages: Python, C++, C, JavaScript, HTML, CSS, SQL, PostgreSQL

Frameworks/Tools: React.js, Node.js, Express, Flask, Tailwind, Git, Linux, VS Code, Postman

Domains: Full Stack Development, Data Science, IoT, AI/ML, LLMs

Leadership / Extracurricular

Accelerate Coding Club

Jan 2025 – Present

Competitive Programming Member

R V College of Engineering

- Actively participate in Competitive Programming contests, solving algorithmic challenges on platforms like Codeforces, Leetcode, and CodeChef.
- Conduct coding sessions and mentorship programs to help peers enhance problem-solving skills and algorithmic thinking.
- Collaborate with team members to represent the college in intercollegiate programming competitions and hackathons.
